## **Dr. J. Scott Osborne III Joins MedAware Systems' Scientific Advisory Board**

January 27, 2015 - Broomfield, Colorado

MedAware Systems, Inc. announced today that J. Scott Osborne III, PhD is joining the company's Scientific Advisory Board. Dr. Osborne will provide considerable expertise in the review and analysis of medical research literature as well as a broad network of influential medical professionals with whom he has worked while at the National Institutes of Health. Dr. Osborne currently serves as a consultant for faculty and post-doctoral fellows at various universities and medical schools throughout the U.S. He is a highly renowned expert in the field of epidemiology biomedical research.

In his long tenure at the NIH, Dr. Osborne was responsible for all aspects of assessing the scientific merit of over many thousands of research applications, requesting over \$5.5 billion in support. He also was responsible for selecting and training members of a number of Scientific Review Groups (SRGs) chartered by the U.S. Congress.

"We are pleased to welcome Dr. Osborne as the newest member of our prestigious Scientific Advisory Board," says Michael Willis, CEO. "His long and extensive experience in medical research as well as his decades long relationships with the most influential medical professionals in the world will be an enormous asset", Willis adds.

Dr. Osborne received a BA (anthropology, chemistry) from the University of Miami, a MA (physical and medical anthropology) from Florida Atlantic University, a PhD (medical anthropology, epidemiology) from Michigan State University, and a MPH (epidemiology, biostatistics) from the University of North Carolina. He also completed a NIH Post-Doctoral Fellowship in epidemiology.

He has received numerous awards and recognitions, including a Lifetime Achievement Award, Epidemiology and Disease Control Scientific Review Group, NIH. He is a member of the American College of Epidemiology, the American Public Health Association, the Council on Epidemiology and Prevention, the American Heart Association, and the Society for Epidemiologic Research.

### **ABOUT MEDAWARE SYSTEMS, INC.**

MedAware Systems, Inc., based in Broomfield Colorado, is developing a first-of-its-kind database of all available medical research information where data have been extracted, normalized and standardized to provide highly accurate search and retrieval of evidence-based medical treatments and outcomes. With data precisely filtered by patient profile and disease this subscription service will eliminate today's cumbersome, time-consuming, and highly inaccurate keyword searches. The service also offers instant meta-analysis of data across numerous studies, providing users information from tens, hundreds, or thousands of studies in minutes.
