Peter Nichol, MD, PhD appointed Chairperson of MedAware Systems Scientific Advisory Board

April 23, 2015 - Broomfield, Colorado

MedAware Systems, Inc. announced today that Dr. Peter Nichol has been appointed as Chairperson of the Company's Scientific Advisory Board. Dr. Nichol has been a member of the Advisory Board since 2013.

Dr. Nichol is a renowned surgeon and researcher. He is certified by the American Board of Surgery in General Surgery and Pediatric Surgery. Dr. Nichol specializes in minimally invasive surgery, including pediatric general surgery, pediatric thoracic surgery, minimally invasive pediatric surgery, and pediatric trauma surgery.

Dr. Nichol has served as a principal investigator, or co-investigator, on numerous NIH funded research grants and is widely published in leading peer reviewed journals. His research is focused on pediatric nutrition and caring for children with congenital anomalies of the intestine.

"As both a surgeon and a researcher, Dr. Nichol provides invaluable leadership, insight, and guidance", says Dr. Zung Vu Tran, Chief Science Officer for MedAware Systems. "His expanded leadership role on the Scientific Advisory Board will better insure that the evidence-based data we provide to physicians and their patients is complete, accurate, and unbiased. With Peter, along with our other eminent scientific advisors, we believe that MedAware Systems will become the de facto standard and primary resource for medical treatment and outcome information contained in the vast and growing store of medical research", he adds.

Dr. Nichol is a graduate of the Washington University School of Medicine, St. Louis, MO. Prior to joining the faculty at the University of Wisconsin School of Medicine and Public Health, he was an Assistant Professor and Research Fellow at Children's Health Research Center, University of Utah, and a Staff Surgeon and Pediatric Surgery Fellow at Children's Hospital of Philadelphia, Philadelphia, PA.

ABOUT MEDAWARE SYSTEMS, INC.

MedAware Systems, Inc., based in Broomfield Colorado, is developing a first-of-its-kind database of all available medical research information where data have been extracted, normalized and standardized to provide highly accurate search and retrieval of evidence-based medical treatments and outcomes. With data precisely filtered by patient profile and disease this subscription service will eliminate today's cumbersome, time-consuming, and highly inaccurate keyword searches. The service also offers instant meta-analysis of data across numerous studies, providing users information from tens, hundreds, or thousands of studies in minutes.
